INSTANT SANDBAG

The Instant Sandbag is the 'modern' equivalent to a traditional sandbag. Inside the hessian bag is an incredible polymer which absorbs substantial amounts of water in three to five minutes. Once inflated, the bags are ready to use just like a sand-filled sandbag.

Applications

Coming flat-packed, the light and easy to store Instant Sandbags are a great alternative to traditional sand-filled sandbags. Instant Sandbags can be used in almost any situation where there is the risk of water ingress. Use to dam or divert water flow.

Technical details

Made from a hessian or jute material, the inflatable Instant Sandbag is approximately 300mm x 600mm and less than a centimetre deep before activation. Inside the bag is a Super Absorbent Polymer which will expand to around 16 kilos in weight when it makes contact with water. Instant Sandbags are 95% biodegradable and will return to flat again after use so, are easily disposed of and much kinder to the environment than sand filled sandbags.

Packaging volumes

Usually packed in tens or multiples of ten, the Instant Sandbags come in a protective wrapper and will store for up to five years.

- ✓ Compact and easy to store
- ✓ Easy to use
- ✓ Lightweight
- ✓ Environmentally friendly

INSTANT DOOR GUARD

The Instant Door Guard is a temporary flood defence product specifically for use in doorways. This product is quick and easy to fit, lightweight and re-usable.

Applications

The Door Guard should be used to defend doorway apertures where sandbags would traditionally be the only alternative. Sandbags would normally take a considerable time to install and prevent the door from being opened once in place, but with the Door Guard which is fitted in seconds, entry and exit is still possible.

Technical details

The Instant Door Guard is modified to fit any doorway size. Made from expandable composite materials, the Instant Door Guard creates a watertight seal as water pressure against it increases. Discreet acrylic runners are fitted to your doorframe and the Instant Door Guard slides into place in seconds. Once the water has receded, the compact system is convenient to store and can be re-used as many times as needed.

Packaging volumes

Packed in either one metre or two metre lengths, together with acrylic runners.

- ✓ Compact and easy to store
- ✓ Simple to Install
- ✓ Lightweight
- ✓ Totally re-usable

INSTANT FLOOD SENTRY AIR BRICK COVER

This product is an emergency seal for airbricks. The Instant Flood Sentry Air Brick Cover is a quick and easy to fit product which can help to reduce or delay the ingress of water.

Applications

This product should be used externally, as a temporary measure to seal air bricks in the event of flooding. The method of application is essentially 'peel and stick' and air brick dimensions should be checked prior to purchase to ensure compatibility with Flood Sentry Airbrick Cover.

Technical details

Instant Flood Sentry Air Brick Cover is a self adhesive pad which will fit air bricks measuring 220mm x 110mm (10.2 x 4.4 inches). The product has been awarded a BSI Kitemark. Instant Flood Sentry Air Brick Cover is not intended as a permanent seal and should be replaced after each flooding event.

Packaging volumes

The Instant Flood Sentry Air Brick Cover package contains two pads

- ✓ Compact and easy to store
- ✓ Simple to apply
- ✓ Just peel and stick
- ✓ Efficient temporary sealant
- ✓ No damage to brickwork
- ✓ BSI Kitemark

INSTANT FLOOD SENTRY DOOR AND WINDOW SEAL

This product is an emergency seal for doors and windows. The Instant Flood Sentry Door and Window Seal is a quick and easy to fit, adaptable product, which can help to reduce or delay the ingress of water.

Applications

This product should be used externally, as a temporary measure to seal doors and windows, patio or garage doors and even for gaps, holes or cracks in walls in the event of flooding. The method of application is essentially 'measure, cut, peel and stick' and dimensions should be checked prior to purchase to ensure Instant Flood Sentry Door and Window Seal is compatible with the area requiring protection.

Technical details

Instant Flood Sentry Door and Window Seal is a self adhesive roll which measures 2.2m x 13cm. The product will defend against flooding but can also be used in conjunction with many other flood prevention products such as door barriers. The product has been awarded a BSI Kitemark. Instant Flood Sentry Door and Window Seal is not intended as a permanent seal and should be replaced after each flooding event.

Packaging volumes

The Instant Flood Sentry Door and Window Seal package contains one roll (2.2m x 13cm).

- ✓ Compact and easy to store
- ✓ Won't damage paintwork
- ✓ BSI Kitemark
- ✓ Efficient temporary sealant
- ✓ Versatile
- ✓ Peel and stick

INSTANT INFLATABLE TOILET SEAL (SMALL)

This unique product is an emergency seal for toilet pans. Made from recyclable materials, the Instant Inflatable Toilet Seal is a robust and easy to fit flood solution which will minimise the likelihood of floodwater entering your property.

Applications

Flooding in the home is often caused by backflow through a downstairs toilet. The Instant Inflatable Toilet Seal can be fitted in less than a minute and can be used on a variety of toilet sizes.

Technical details

The Instant Inflatable Toilet Seal is made of a sturdy but lightweight recyclable plastic material which cleverly integrates an inflatable seal. When fitted, the product creates a 'vacuum' seal between itself and the water and can be used time and again. Back flow of sewerage through the drainage system has been recognised as a key component of flooding situations and can occur even if your property is not immediately at threat from flooding above ground.

Packaging volumes

The Instant Inflatable Toilet Seal package contains one small or medium seal and pump.

- ✓ Compact and easy to store
- ✓ Made from recyclable materials
- ✓ Easy to Install
- ✓ Re-usable

INSTANT INFLATABLE TOILET SEAL (MEDIUM)

This unique product is an emergency seal for toilet pans. Made from recyclable materials, the Instant Inflatable Toilet Seal is a robust and easy to fit flood solution which will minimise the likelihood of floodwater entering your property.
